

Announcements

- **Assignment 1 due on Wednesday night.**
- **CA office hours!**
 - The full matrix of office hours is posted [right here](#).
 - Office hours are great for asking questions about the lecture material and the assignment specifications that can't be easily managed on Piazza.
- **Reading for this week:**
 - Do a close reading of the Bryant & O'Hallaron reader, Chapter 2 (much of which you know about already: **open**, **read**, **write**, etc) and Chapter 1 (in that order). Read these two chapters slowly and carefully over the course of this week.
- **Expect to finish up filesystems, naming, and layering today, and we'll begin multiprocessing and exceptional control flow if we finish a little early.**
 - All multiprocessing and exceptional control flow examples can be found in `/usr/class/cs110/lecture-examples/spring-2017/processes`.
